The Gold Coins above mentioned, such as Sovereign, 18, 20 Franc Piecess, X Thalers, Spanish and Patriot Doubloons and Dollars, &c., will of course fluctuate, with the difference between demand and supply. Their quotation in this book can only correspond with their value in trade, and not what they are actually worth in passing from hand to hand.

It is to be observed that we have reduced the quotations to the Gold Coins of Central America. Pieces dated 1830, of reduced fineness and less weight, of less value, have recently made their appearance. From the close resemblance of the Austrian Half Sovereign and Ducat, it is often difficult to ascertain the one for the other, and in order to facilitate the reader's future, we have placed them side by side on page 7.

There are pieces among the Silver Coins (Bolivian and Peruvian pieces) which in many cases fall short in weight and fineness, and are not worth what the full weight and standard pieces are. These we have not been able to meet the value of the depreciated pieces. Some doubt has been expressed as to the purity of the late issues from the Mint. We have, therefore, omitted to note their standard fineness.

This "Test Scale," by its ready detection of the spurious "Swedet" Gold coin, of from 10 to 150 dollars value, is invaluable in receiving Gold Coins while it will go for standard gold coins up to one thousand dollars.
